Description:

SEAQUEEN® is an excellent water-soluble inorganic fertilizer containing Potassium, alginic acid, organic matter, and Nitrogen recommended for use during plant growth periods that require high levels of potassium for use on vegetables, flowers, lawns, cotton, fruit trees, fruits, tea, wheat, rice, corn, peanuts, and various economic crops, etc.

It is ideal for the reproductive stages of crops as it enhances the formation of flowers by plants while ensuring their retention on the plant.

SEAQUEEN® also, improves the quality of produce such as fruits, while increasing its post-harvest (storage) life and ability to withstand harsh transport conditions.

BENEFITS OF SEAQUEEN®

- Improves the size of fruit and seeds, yield and quality.
- Enhances density and concentration of soluble substances.
- Increases shelf life.
- Provides better nitrogen assimilation, activates synthesis of many enzymes and vitamins.
- Promotes plants growth and improves sprouts ripening, enhances sprouts growing capacity and crops resistance to lodging.
- Positively influences on flowering, increases color intensity of flowers.

METHOD OF APPLICATION: Can be applied through foliar spraying using 1,000 L of water per hectare or by fertigation/nutrigation at an interval of 14 days.

APPLICATION RATE
